CHIPPER BODY

The standard for tree care professionals

Our Chipper Body is built with Hardox HiAce, the new standard in corrosion-resistant wear steel for acidic environments.

Using this hardened steel gives tree care professionals the advantage of longevity and protects the body even if paint is scratched.

Design

- Made of 5/32" HiAce wear plate to withstand acidity and corrosion in extreme working conditions
- 3/16" Domex tailgate
- Cross memberless design
- Flat side for advertisement

Dimensions

- Length: 11', 14' and 16'
- Width: 96"
- Side height: 66"
- Tailgate height: 30"

Tailgate

- 3/16" high tensile steel single panel
- 270° swing
- Lockable internal pruner compartment, accessible without opening tailgate
- Easy locking mechanism with 1/2" diameter spring-aided unlatching

Hoist

- Class 50, double acting, heavy duty underbody hoist
- Quick and easy underbody hoist installation
- Security prop included
- Front mount telescopic hoist available

Lighting

- All light wiring in a sealed wire harness

Aluminum Saddle Toolboxes (Optional)

- Vertical and horizontal lockable boxes
- Hidden hinge
- Security bars
- Thickness: .100
- 11' saddle option (as shown above)
- Side mounted and other configurations available
